Professional Summary

Aspiring Software Development & Testing Engineer with strong foundational knowledge in Frontend Development, Core Java, SQL, and Manual Testing. Experienced in building responsive web applications, implementing backend logic using object-oriented programming principles, designing and executing test cases, and managing relational databases. Strong analytical, debugging, and problem-solving abilities with adaptability to dynamic work environments.

Technical Skills

Web Technologies – HTML5, CSS3, JavaScript

- Developed responsive and user-friendly web interfaces using semantic HTML and modern CSS.
- Implemented dynamic functionality using JavaScript including DOM manipulation and event handling.
- Applied form validation techniques and improved UI/UX consistency.

Core Java

- Strong understanding of OOP principles (Encapsulation, Inheritance, Polymorphism, Abstraction).
- Worked with Collections Framework, Exception Handling, and Multithreading basics.
- Developed database-driven applications using JDBC.

SQL

- Designed and managed relational database schemas.
- Performed CRUD operations using joins, constraints, and indexing.
- Optimized queries for better performance and ensured data integrity.

Software Testing (Manual)

- Designed and executed test cases based on functional requirements.
- Performed functional, regression, and exploratory testing.
- Logged and tracked defects and verified bug fixes.

Projects

Personal Portfolio Website

- Designed and developed a fully responsive portfolio website using HTML, CSS, and JavaScript.
- Implemented interactive navigation menus and dynamic content rendering.
- Optimized layout for cross-device compatibility.

Student Management System (Core Java + SQL)

- Developed a console-based application implementing full CRUD operations.
- Integrated SQL database using JDBC for real-time data management.
- Applied modular programming practices for scalable architecture.

Professional Experience

Singareni Collieries Company Limited, Ramagundam

Apr 2021 – Apr 2022

Overman

- Supervised underground mining operations ensuring adherence to safety standards.
- Maintained production reports and monitored workflow efficiency.
- Coordinated with cross-functional teams to enhance productivity.
- Identified inefficiencies and implemented corrective measures.

Singareni Collieries Company Limited, Ramagundam

Feb 2019 – Mar 2019

Project Trainee

- Assisted in execution of mining-related projects.
- Monitored daily productivity metrics and documentation.
- Supported supervisors in ensuring timely project completion.

Education

M.Sc. Psychology – Dr. B.R. Ambedkar Open University

2025 (56.5%)

B.Com – Government Degree College

2021 (CGPA: 6.26)

Diploma in Mining Engineering – Mother Theresa College of Engineering & Technology

2019 (65.29%)

SSC – Pragathi High School

2013 (53%)

Core Competencies

Frontend Development — Backend Development — Database Management — Object-Oriented Programming — Manual Testing — Problem Solving — Debugging — Analytical Thinking — Team Collaboration — Adaptability — Continuous Learning
